Welcome : This is the tenth symposium organized by International Society of Management Engineers to discuss on the present state of arts of "Management Engineering." The symposium is held for promoting researches on the management engineering. The management engineering was renamed from "Industrial Engineering" where the strength is placed on management as well as production in industrial engineering fields. Since Fuzzy Sets were proposed by Lotfi A. Zadeh, the research of fuzzy systems has been done very widely and rapidly. Today, the concept of fuzzy systems is merged and fusion with various concepts and technologies. The Intelligent Computing is intending to employ such methods to deal with words. The symposium is concerning with rather wide range including organization, corporate strategy, project management, management of technology, as well as intelligence, computation, operations research, probability and possibility theories, fuzzy sets, rough sets, approximate reasoning, linguistic information processing and automata, knowledge discovery, clustering and data analysis, fuzzy control and modeling, optimization under uncertainty and its applications, games and decision making, fuzzy analysis, and fuzzy game. We are welcoming all participants to attend and present recent results and discuss on management engineering from the perspective of soft and innovational computing.

✓Submission of your paper

Important Date	Deadline	Note
Invited Papers	15 July 2013	Pages 6 to 10
General Papers	15 July 2013	Pages 4 to 8
Acceptance Notification	15 August 2013	
Camera-Ready Papers	15 September 2013
